### Additional Grant Information

#### Current & Pending Grants and Research

Please list any grants for which the Principal Investigator and all key personnel are currently or may be contributing efforts. Details regarding pending and active grants for all key personnel (e.g., PI, co-PI, Research Associate, Consultants) must accompany the application or the application will not be considered for funding. Specific information should include the grant title, grant duration, amount awarded, the role of the individual and their % of effort. A declaration of overlap with the Pardee grant application should also be included.

Please note that the Elsa U. Pardee Foundation will not consider applications for funding if there is substantial overlap

with currently funded research. Substantial overlap with the pending grants is acceptable. However, if multiple grants with substantial overlap are awarded, the expectation is that the PI will accept only one funding source. To assist with the application review, the original Project Abstract for each currently funded and pending grant must be provided. In accordance with NIH guidelines, the extent of overlap will be evaluated by examining whether the hypothesis, aims, or outcome measures are the same or highly similar.
